

Maine's Tent & Party Specialists

7 Quart Stainless Steel Soup Tureen (Sterno)

Operations

1. Remove the food and water containers from the base and add about 16oz. of water into the water container. **NEVER OPERATE WITHOUT WATER**
2. Never overfill with water or let food container float up.
3. Place a 7 oz. can of sterno into the sterno holder. Carefully pry off lid and then place it in the soup tureen base before lighting. Do not place sterno can in direct contact with tabletop or tablecloth. Never leave flame unattended.
4. Place the water container back on the base and then slide the food container back into it.
5. When finished **DO NOT TRY TO BLOW OUT THE STERNO**. To extinguish place the closed sterno cover over the top of the sterno holder. The sterno will be too hot to touch, so allow it to cool before removing from base.

Maintenance

Allow the unit to cool before cleaning it.

The stainless steel food and water containers and ladle are machine washable.

The base piece with it's gold trim **IS NOT MACHINE WASHABLE**. Simply wipe it off with a damp cloth. Always return clean to avoid additional charges.
